REPORT OF FIELD STUDY TRIP OF DEPARTMENT OF HISTORY

SIVASAGAR GIRLS COLLEGE, SIVASAGAR
SESSION 2020-21

Date of field study trip : 9th Feb 2021
Place of visit : Charaideo
No. of Students : 16
Names of teachers: 1) Mrs. D. J. Bhuyan
accompanying the teams 2) Mrs. Ritusmita Gogoi

Objective of visit : To familiarize and acquaints the students about the burial system of the Ahom kings which they study in their syllabi related paper Assam History.

Outcome: The students could see for themselves the maidams (burial places) of the Ahom kings and queens at the Charaideo hillocks resembling the shape of the pyramids which are just objects of wonder revealing the excellent architecture and skill of the sculptors and masons of Assam in the medieval period.

REPORT ON FIELD WORK

Department of Economics

A Report on the Field study, 2021

Date: 20.12.2021

Department of Economics, Sibsagar Girls' College conducted a field based study on 16th December, 2021. This year the topic was 'Opportunities and Challenges of Tourism in Likabali'. The study was carried out by the students under the supervision of the respective faculty members of the department. Tourism industry can play a vital role in an economy. It is a labour intensive industry. A large number of unemployed persons can be employed by this industry. Arunachal Pradesh is blessed with magnificent and inimitable tourism resources that can be capitalized upon profitably to make it a big in tourism sector. The state has just begun to open up the doors of its treasure trove of incredible tourism resources. But the fact that tourism as an industry in the state is in its initial stage. Likabali as a tourist spot has enormous opportunities. Likabali is a sub-divisional headquarters of West Siang District of Arunachal Pradesh. It is one of the most widely known and important archaeological sites of the state. It is also the entry point to Arunachal Pradesh from Silapathar in Dhemaji district of Assam. The sight of the place is breathtaking. The place was hilly and there was a small iron bridge. It is a calm and peaceful hideout for a nature lover. With this backdrop our field study intended to study the area's tourism potential through Strengths, Weakness, Opportunities, and Threats (SWOT) analysis. The results of the study shows that Likabali has a bright prospect in coming up as a tourist destination in future. For this a responsible and a well coordinated effort on the part of all stakeholders, led by the government is required.

REPORT ON FIELD WORK

For 5th Semester students, the place of visit was selected as 'Panidihing Bird Sanctuary' on 21-01-2022. Panidihing was declared as 'bird Sanctuary' in August 1996 by Govt. of Assam. The area, is a complex mixture of grassland and wetland and is known for migratory water fowl. As many as 267 species including 70 migratory species have been recorded in this area. The place is largely affected by human activity like grazing, fishing etc. Students got an excellent opportunity to in site study of different species.

SIBSAGAR GIRLS' COLLEGE

REPORT ON FIELDWORK

Introduction

It is emphasized by each and every students of Botany that educational tours are of great importance for the students of science more especially for the student of Biology. Field studies provide first hand experiences for us that is, it gives a chance to visualize the knowledge of the things which we studied in the classroom. If we go for field study, we get to see many object with our eyes and we can touch them, feel them and pick them up for our further studies. Thus, it is a practical understanding which is very essential for the clear knowledge of the habit, habitat, and distribution It encourage a positive attitude towards science. It is an unavoidable duty for a student of Botany to perform field studies. A field study is a trip to a location right around the career ort may request a bus ride to a different town.

Keeping this in mind, we can perform a number of field studies for our own educational benefits and we can feel free to collect significant plant specimen along with their identification. We should have that much curiosity to attend in the field study Journey.

REPORT ON FIELDWORK

JOURNEY

A educational tour from Sibsagar Girl's College to 'Kaziranga'.

After all everyone's recommendations, we decided to fix the date of our field study tour on 11th June, 2022. By the time, we started our journey on that day as per our planning from our college campus with our department teachers, botany assistant, bearers and our 4th sem students at 7 am by a bus to Kaziranga Orchid Park. We had our breakfast at 10:30am in bokakhat town of Golaghat district which is 22km far from kaziranga Orchid Park. After that, we proceed to Kaziranga and reached there at 12:00 pm. Kaziranga Orchid Park is so beautiful that we were very impressed and delighted at first glance. Our eagerness and craving mood rises to see the inside view of Kaziranga Orchid Park, so-called the India's Largest Orchid Garden. Then our Sir took our tickets for entry. We see and learn a lot of things in the Kaziranga Orchid Park. Their passionate and week trained staffs explained us everything in great detail. This is very proudly matter for us that there are 1314 types of orchids and among those 850 types are found in North-East and 402 types are found in Assam. There we clicked photographs and all and then we took our lunch in a hotel and finally return to home.

The various areas that we visited around the kaziranga Orchid Park were:

- 1) We entered inside the greenhouse where more than 600 orchid species have been collected from across the North-Eastern region.
- 2) A photo gallery of 500 orchids.
- 3) We saw an open stage area for dance performances which promotes native cultures of Assam. These art forms are regularly shown to arriving tourists.

REPORT ON FIELDWORK

4) A rice museum where various kinds of rice varieties indigenous to Assam such as Bora Sawl, Joha Sawl, Aijong Sawl, etc are kept here along with the rice grains.

5) A native fish pond with boating facility.

6) Native flowers and fruits garden.

7) A traditional handloom display and weaving center.

8) A small room area that has on display well framed pictures of various historical monuments of Assam and North East India.

9) A medicinal plant garden.

10) An extensive forest that has native species of trees apart from a cultural centre. This forest also have various varieties of bamboo and cane.

11) Cactus garden where one cactus plant was almost about 6 feet tall.

12) A museum where all the old materials of a culture are collected from different parts of North East India and are displayed such as wooden pot cover, tiwa pot (Tran), circular wicker basket used to store clothes, raincoats of a particular Nagaland tribe, various instruments for keeping silkworms, Takuri- made from elephant's teeth, many important utensils for daily work, an ancient calendar, and various others tribal vessels and arms with other items.

13) Near the entrance, We saw many shops selling wooden rhinos and other items where we can buy as a part of our travel memories.

The journey was really a good experience with our teachers and friends and we enjoyed a lot in Kaziranga Orchid Park which was the most beautiful, peaceful, eye-catching place we ever visited.

REPORT ON FIELD WORK

Description of orchids and plants of Kaziranga.

Kaziranga Orchid Park is located at the distance of 2 km from the Central Range of Kaziranga, Kohora Chariali and stretch out in the area of around 6 acres in the Durgapur village of middle assam in North-East India. Owner-Krishak Mukti Sangram Samiti (KMSS) led by Akhil Gogoi who is the Chairman of the Orchid Park. In Kaziranga National Park,

Some of the- Important Orchids-

- 1) Coconut orchid,
- 2) Orchid Vanda,
- 3) Spider orchid,
- 4) Phalaenopsis lobbii,
- 5) Zygopetalum maculatum
- 6) Odontoglossums,
- 7) Moth orchid (phalaenopsis amabilis)
- 8) Donkey orchid,
- 9) Jokerface orchid,
- 9) Dancing lady orchid,
- 10) Vanilla borneensis orchid,
- 11) Ribbon roots orchid,
- 12) Butterfly orchid,
- 13) Pineapple orchid,
- 14) Rabbit orchid,
- 15) Starfish orchid,
- 16) Taenio orchid.
- 17) Pecteilis triflora,
- 18) Pinalis arnica,
- 19) Liparis viridiflora etc.

Economically important plants-

- 1) Tea,
- 2) Bamboo,
- 3) Cactus,
- 4) Asparagus,
- 5) Vanda Orchid,
- 6) Acampe papillosa,
- 7) Dendrobium jenkinsii,
- 8) Coffee,
- 9) Rubber,
- 10) Mangoli,
- 11) Piper,
- 12) Tectona,
- 13) Adina,
- 14) Borassus,
- 14) Earria,
- 15) Delonix,
- 16) Abrus,
- 17) Mikania,
- 18) Lantana etc.

REPORT ON FIELD WORK

Conclusion

Here, we have come to the end of the field study report to Kaziranga Orchid Park. It was a wonderful experience for us by sharing the wide varieties of orchids and important plants and recalling of the whole overview of Kaziranga Orchid Park while working on this report. This report have developed our visualizing capacity and more interest for further field studies. This field study gave us real insight into the practical knowledge.

Report on Field study 2019

The students of 4th Semester (Major) of Department of Geography, Sibsagar Girls' College visited Longkham village of Mokocheung district, Nagaland for partial fulfilment of Project/Field study prescribed in the respective syllabus. Total 49 students along with 2(two) Teacher-in-charge and the departmental Bearer formed the group. The field report had been prepared under the supervision of Sanjay Das and Madine Hazarika.

The students collected the anthropometric measurement of the Ao people of the Longkham village, socio-economic data, demographic attributes and physical landscape of the village. Finally, A report on 'Anthropometry of the Ao People- An Anthro-Geographical study' had been prepared by the students.

REPORT ON FIELD WORK

❖ Introduction:

Pohugarh was built during Ahom region and it is still home to different bird and animals. The Pohugarh is probably the first zoo, having 350 bighas of land area was established under Ahom King Swardew Dudra Singh alias Sukhrungpha (1696-1714), 1 Mile of Joysagar Tank in the Zerenga Pather with an Octagonal Shape like Ahom coins it has also eight earthen forties each separated by deep moat both in entrance and exit points there had sal wood grand doors. In every 40 animals were kept separately. In the moats aquatic animals including crocodile were kept under full protection. The road leading to Pohugarh was from west of Chongmai Ali via Kalogaon Through it cins "Pohugarh" mens forties for animals but maybe in Ahom pronunciation in become popular as "Pohugarh" which literally means deer park or forties of deer. There were several officers and park for animal welfare viz Hatibarua, Ghurabarua, Kukurasuwa Barua, Sensuwa Brua etc.

❖ Description:

The Pohugarh was build for animals including deer, rhinoceros, tigers, elephants but now it has become home to thousands of migratory birds, winter season brings thousand of migratory birds to pohugarh. The area was designed such a manner that it retins water bodies throughout the year to create a natural habitat for the wild life.

REPORT ON FIELD WORK

3. Purple Moorhen:

It is a very shy bird and hides itself among the cat tail reeds at the slightest disturbance. Pairs are often seen. They forego on insects, mollusks, water beetles and water plant shoots their nest is large made of reed leaves on a floating mass or hidden inside the reed beds. These bird can be seen marshy lands and swamps. They are shiny purple in colour with a red patch on the bald head and red beak.

4. Kingfisher:

It is a small sized, brightly coloured bird. They are tropical birds, the bird is widely known for their dramatic hunting skills as they plunges into the water and catches fish. The shape of the sharp beak and head are aerodynamically perfect helping them dive quicker with greater accuracy.

5. Parrot :

It has a strong curved bill and upright stance, strong legs and claws. Their diets are seeds, nuts, fruits and other plant material. It has a long tail. Parrot is one of the most intelligent bird species. It is mostly found in tropical and subtropical regions, they are also popular as pets to imitate humans speech.

SIBSAGAR GIRLS' COLLEGE

REPORT ON FIELD WORK

6. Greater adjutant:

They have a massive shaped bill, a bare head and a distinctive neck pouch. They feed mainly on carrion and offal; however they are opportunistic and will sometimes prey on vertebrates. They have a distinct light orange sac or pouch, dangling from their necks, which turns deep orange and red during the breeding season. The widespread destruction and degradation of the wetlands that scavenger birds need to forage and the loss of its nesting trees, led to a decline.

7. Lesser Adjutant:

It has a bare neck and head. It is however more closely associated with wetland habitats where it is solitary and it is less likely to scavenge than the related greater adjutant. The adult face is red and neck is yellow while the juvenile has a brownish head and a white, thinly feathered neck. They have a slender bill, all dark upperwings.

8. Openbill stork:

It is greyish or white glossy black using and tail and the adults have a gap between the arched upper mandible and recurved lower mandible. Young birds are born without this gap which is thought to be an adaptation that aids in the handling of snails, their main prey. They make long distance movements in response to weather and food availability.

REPORT ON FIELD WORK

9. Crow:

It is a glossy black bird found in most parts of the world. Primarily a scavenger, feeding on leftover rubbish from human found in a wide range of habitats mostly around human habitats. They are omnivores. They occasionally steal food from other animals. Crows will make off with shreds of roadkill and store tidbits in trees, caching the meat and save for later consumption.

10. Indian Cormorant:

It is a member of cormorant family. It is found mainly along the water of the Indian substances. It is a gregarious species that can be easily distinguished by similar sized other cormorant by its blue eyes, small head with a sloping forehead and a long narrow bill ending in a hooked tip. Frequently seen swimming with its body but in the water head and neck pointing upward and suddenly disappearing under water to catch fish.

11. Crested Drongo:

It is black with a bluish green sheen, a distinct crest on the forehead and a forked tail. Perches prominently in the open swooping out to catch insect on the wing. They are found in all types of forests at low and a middle elevations. They can cope with almost any environment.

12. Bar Headed Goose:

It is a goose that breeds in central Asia in colonies of thousands near mountain lakes. It lays three to eight eggs at a time in a ground nest. Bold black and white head and neck pattern unlike any other goose, also orangey yellow bill and legs. In flight appears mainly pale gray with broad black trailing edge to wings.

13. Greylag Goose:

It has mottled and barred grey and white plumage and an orange beak and pink legs. Its distribution is widespread with birds from the north of its range in Europe and Asia migrating southwards to spend the winter in warmer places. They are in flight shows extensively pale gray leading edge to upper wings, rather pale under wing coverts, broad white tail tip.

14. White Wagtail:

It is a small passerine bird. They are found in rocky places, near rivers. They feed on ground or along edge of water. Eats mostly insects in crevices in stone walls and similar natural and non-made structures. They are also found in turns and village.

REPORT ON FIELD WORK

❖ Conversation strategies:

Many birds are facing extinction in the next century according to world watch institute. So we have to protect the birds the environmental problems ,we face today are even more complex, and we need a new generation of committed conservationists to counter them. We should protect birds from pets like dogs and cats. By restoring natural habitate ,in our community. We should keep distance from birds as they need space for perform theid daily acitivity. Avoid the use of pesticides and herbreide pellets. Because of their sensitive to habitat chang and are esay to cencus birds are and important tool for ecologists measuring the healts of environments

❖ Conclusion:

It was an amazing experience ar Pohugarh. We know about the different specis of birds and their habitat and about the food habit. We sow the birds of defferent sizes, different colours, ,they kipet the climit ,stable, oxygenate ari and transform pollutants in to nutriants. Let us save the birds before we come to a stage whare are save to list few birds existing.

Date: 15th Dec, 2021

Sub: Seeking permission to arrange Educational Field Trip to Likabali.

Respected Sir,

With due respect, I would like to inform you that The Department of Economics, Sibsagar Girls College is organising an Educational Field Trip to Likabali, Dhemaji District of Assam on 16th of December, to 'Explore Tourism Potentiality of the place'. It is an important trip for the students, as they will be able to visit the place practically which will help them to analyse things critically. After this visit they will submit a report of the visit. I have attached the list of the students who are going on this particular trip.

Therefore, I kindly request you for your approval. We will be highly thankful to you.
